

Name _____ Date _____ Class _____

Word Problem Practice

Directions: Use a strategy you have learned in this unit to solve each problem. Write your answer in a complete sentence.

1. Adam made \$16 mowing lawns over the summer. If he charged \$8 for each lawn, how many lawns did he mow?

5. An airplane compartment can hold 5 pieces of luggage. If a small plane had 10 compartments, how many pieces of luggage could they hold?

2. Emily sent four text messages a day. How many texts would she have sent after nine days?

6. Victor bought several boxes of books at a yard sale and ended up with 20 books total. If each box had 4 books how many boxes did he buy?

3. Luke has forty-eight action figures he wants to display. If each shelf in his room can hold six figures, how many shelves does he need?

7. John was reading through his favorite book series. He had 36 books to read total. If he read 9 books each week, how many weeks would it take him to finish the series?

4. Billy was reading through his favorite book series. Each week he read seven different books. How many books would he have read through after nine weeks?

8. Katie was drawing on scrap paper. She could fit 6 drawings on each page. If she has 7 pieces of paper, how many drawings can she make?
